Q&A - Tokenomics

- Goal of the token?

Collectively put our minds together and build a shit driven rocket.

- When will it be on an exchange?

Exchanges can make or break a coin. The cheapest options will only lead to disappointing performance. Therefore, we are saving for a decent exchange listing.

- Why have you been developing this since July 2021?

I didn't want to create something that would just be flash in the pan, I wanted to try my best to create something that'll last.

- Which charity would you like to donate to?

We have a very humbly small development wallet but If we see a community member in need of aid we'll do what we can to set something up for them.

- Why these tokenomics

Tokenomics Buy

- * 21,000,000 ← bit rhymes with shit and and I wanted to give people a sense of connection to their shit.
- * 0% Transfer ← a zero transaction fee makes it easy to share your shitcoins with others.
- * 1% Stake ← stakers should be awarded as we grow the shitcoin army
- * 4% Auto-Liquidity ← more liquidity means the coin is firmer and less likely to shit the bed
- * 1% Development ← pumped straight back into the coin in the form of acquiring listing requirements.

Tokenomics Sell

- * 21,000,000 ← bit rhymes with shit and and I wanted to give people a sense of connection to their shit.
- * 0% Transfer ← a zero transaction fee makes it easy to share your shitcoins with others.
- * 2% Stake ← stakers should be awarded as we grow the shitcoin army
- * 6% Auto-Liquidity ← more liquidity means the coin is firmer and less likely to shit the bed
- * 1% Development ← pumped straight back into the coin in the form of acquiring listing requirements.
